ASSIGNMENT 2

15 September 2025 23:49

NAME	SAURABH SINGH
BRANCH	CSAI 4
ROLL NO.	2401921520233
E-MAIL	saurabhqr@yahoo.com

Q1. Create a user of your name and verify it whether it is created or not.

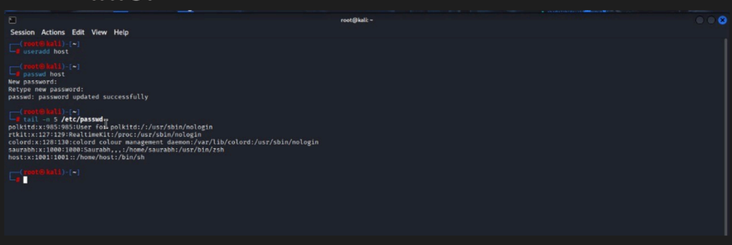
STEPS

1. sudo su : Switches to the root (superuser) account to get administrative privileges required to add or manage users.

2. useradd host : Adds a new account named host to the system (creates an entry in /etc/passwd and /etc/ group).

3. passwd host : Sets (or changes) the UNIX password for the user host.

4. tail -n 5 /etc/passwd : Shows the last 5 lines of /etc/passwd. /etc/ pas swd is the canonical file listing users and basic account info.



Q2. Create a group of your name and verify whether the group is created or not.

STEPS

1. sudo su : Switch to the root user to get administrative privileges required for managing users and groups.

2. groupadd local : This creates a new group named local.

3. tail -n 1 /etc/group : This shows the last group entry.

4. groupdel local : This removes the group from the system.
