ASSIGNMENT 4

17 November 2025 03:03

NAME	Saurabh Singh
BRANCH	CSAI 4
ROLL NO.	2401921520233

Reset Kali Linux Password

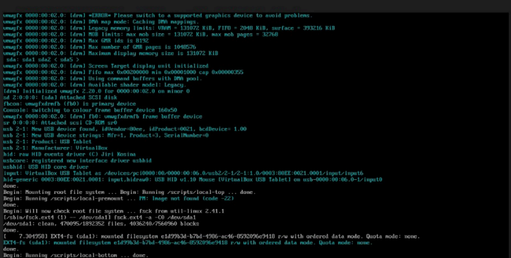
STEPS

1. Start the Kali Linux machine.
2. When the GRUB menu appears, press E
   As soon as you see the Kali boot menu.
   This opens the GRUB boot configuration screen for editing.

3. Navigate to the line containing splash. Use the arrow keys to scroll and find the line that looks like this:

   linux /boot/vmlinuz... root=UUID=xxxx ro quiet splash
4. Remove "quiet splash".
5. Add this at the end of the line :
   "rw init=/bin/bash"

   So the full line will look like:
   linux /boot/vmlinuz... root=UUID=xxxx rw init=/bin/bash
6. Press ctrl + x to boot. This will start Kali Linux in root shell mode without asking for a password.



7. You now have root access:
   root@(none):/#
8. Type the following command to see the usernames : ls /home
9. Reset the password of your user. Use the passwd command:
   Now type the new password twice.

   After successful update, you will see:
   password updated successfully
10. Reboot the system
    using command: reboot -f
11. After reboot, you can log in with the new password you created.
