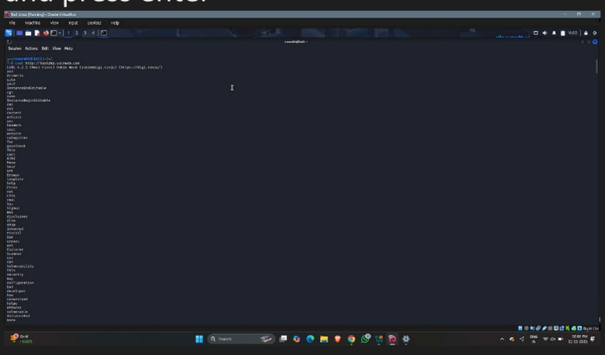
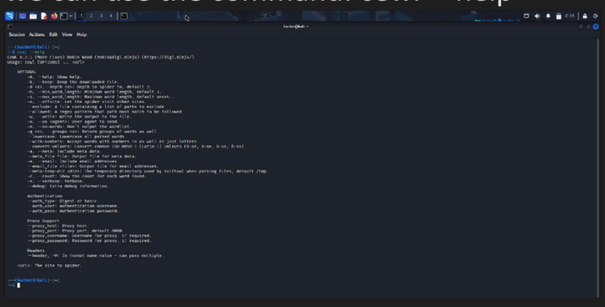
Name	Saurabh Singh
Section	CSAI 4
Roll No.	2401921520233
E-mail	saurabhqr@yahoo.com

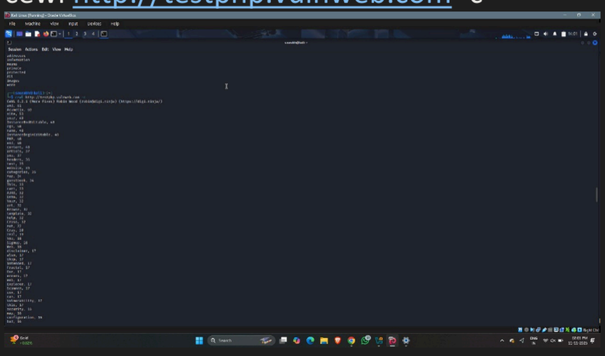
1. CEWL is used for creating custom wordlists by scraping words from a target website.
2. To find these details we use the cewl command followed by the website link.
   Eg: cewl http://testphp.vulnweb.com
   and press enter

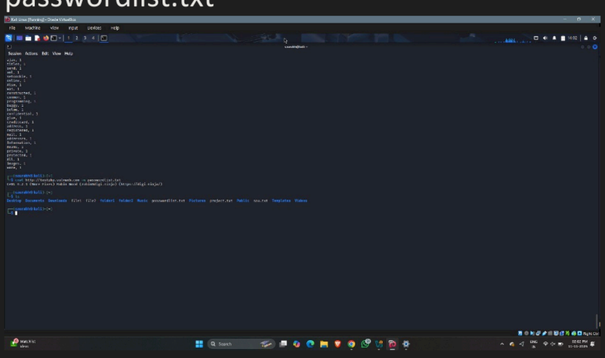


3. To get more information regarding the cewl we can use the command: cewl -- help



4. To count for results we can use the command :
   cewl http://testphp.vulnweb.com -c





5. To save all the password in a file to work as a password list we can use the command:
   cewl http://testphp.vulnweb.com -w passwordlist.txt
