Crack hash in rar file

16 November 2025 19:51

Name	Saurabh Singh
Section	CSAI 4
Roll No.	2401921520233

1. To crack a hash we first have to create a file

```
┌──(hacker㉿kali)-[~/zphisher]
└─$ touch pass.txt
```

2. Then write some content in file.

```
┌──(hacker㉿kali)-[~/zphisher]
└─$ cat > pass.txt
You are HACKED!!!^C
```

3. Now we have to zip the folder with zip extension we can also use the rar extension.

```
┌──(hacker㉿kali)-[~/zphisher]
└─$ zip --password a123 hack.zip pass.txt
  adding: pass.txt (stored 0%)
```

4. To verify.

```
┌──(hacker㉿kali)-[~/zphisher]
└─$ ls
auth  Dfile  Dockerfile  hacks.txt  hack.zip  LICENSE  make-deb.sh  pass.txt  README.md  run-docker.sh  scripts  zphisher.sh
```

5. Now we have to retrive the hash first from the file in order to find a password

```
┌──(hacker㉿kali)-[~/zphisher]
└─$ zip2john hack.zip > hacking.txt
ver 1.0 efh 5455 efh 7875 Scanning for EOD... FOUND Extended local header
hack.zip/Dfile PKZIP Encr: 2b chk, TS_chk, cmplen=12, decmplen=0, crc=00000000 ts=BEB5 cs=beb5 type=0
Skipping short file Dfile
ver 1.0 efh 5455 efh 7875 Scanning for EOD... FOUND Extended local header
hack.zip/pass.txt PKZIP Encr: 2b chk, TS_chk, cmplen=12, decmplen=0, crc=00000000 ts=0042 cs=0042 type=0
Skipping short file pass.txt
```

6. Output

```
┌──(hacker㉿kali)-[~/zphisher]
└─$ cat hacking.txt
```

7. Now we can start cracking the password.
8. Create a word list.
9. Now we can start cracking the password with the following command

```
┌──(hacker㉿kali)-[~/zphisher]
└─$ john --wordlist=wordlist.txt hacking.txt
Using default input encoding: UTF-8
No password hashes loaded (see FAQ)

┌──(hacker㉿kali)-[~/zphisher]
└─$
```
