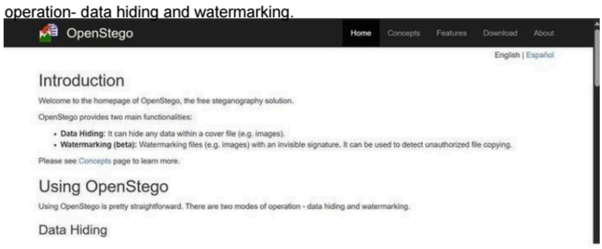
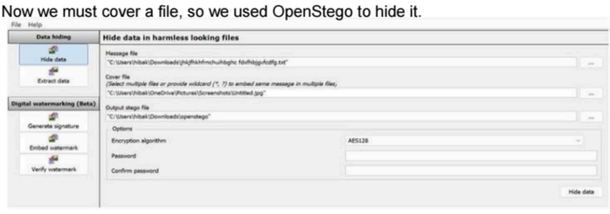
1. OpenStego can hide any data within a cover file. There are two modes of operation- data hiding and watermarking.

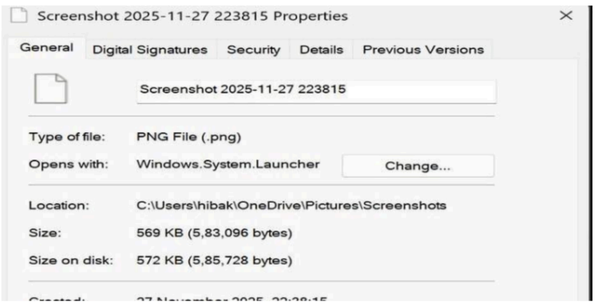


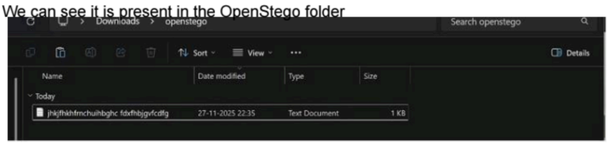
2. Now we will install it for windows.

3. Now we must cover a file, so we used OpenStego to hide it.



4. As we can see, it took 572 bytes, but its original size is much less than that.





5. We can see it is present in the OpenStego folder
